Design Experience.

Selected projects · 2025 — 2026

01

FocusFlow — Executive Function OS

2026

Productivity web application for neurodivergent users

Designed and built a productivity tool through iterative prompt engineering (VibeCoding). Features energy-adaptive layouts, guided task templates, and a "Next Best Action" system that reduces decision fatigue. Owned the end-to-end UX from research framing through hi-fi prototype.

VIBECODING

WEB APP

02

SynthViz — Audio Visualizer

2026

Real-time audio visualization engine, three modes

Created a browser-based audio visualizer with three dynamic modes (Rings, Aurora, Pulse) using the Web Audio API. Explored how prompt refinement and creative direction can produce polished, interactive media experiences. Shipped as a self-contained web experience.

03

Cloudflare DDoS — Case Analysis

2025

Information design study on cybersecurity communication

Analyzed how Cloudflare communicates major DDoS incidents to public audiences using data visualization and clear public messaging. Translated dense technical data — peak Tbps, packet counts, geography — into a layered visual narrative.
